Hi

David

2015-11-11

1 Introduction

This is introduction. Summery will be given in section

# 2 about Linux

Figure 1: This is a meme [1]

figure 1 shows a meme I found here here [1]

2.1 This is a table

Table 1 shows a table [1].

---

[1]This is a footnote

Table 1: Here you can write a caption

You can write things here	here	and also here

3 Math

in LaTeX you can also write equations and formulas, not just text! Equation 1 shows a varible ξ and z.

$$\xi = ln\left(\frac{1}{z}\right) \; ; \; z = \frac{p_{\parallel}^{track}}{p^{jet}} \tag{1}$$

4 Summary

We have learnt the following:

- Linux is good for you

- LaTeX is good for:

  1. things
  2. other things

we can also write unformatted text using verbatim enviroment, but sometimes we have to specify this in the preamble:

```
\usepackage{verbatim}
```
